What Can I Do?

1. **Come to important meetings:** Drop by My Street, My Choice Sonoma Team gatherings at the Sonoma Farmer’s Market on the Square **every Tuesday** from 5:30 to 7:30 pm (look for our tall, cell-site mock up). Attend the Sonoma Planning Commission Meetings on **Sept 23** and **Oct 11** at 6:00 pm at 177 1st St. West. Bring signs to oppose the applications for the **first three of many** Close Proximity Microwave Radiation Antennas (CPMRAs), aka Small Cells — **proposed to be 25 to 100 feet from homes**.

2. **Click Sonoma on mystreetmychoice.com** and then click the **green button** at the top to complete a web form that will enter your comments into the public record. Also, email lmdevincent@comcast.net for additional flyers to distribute in your neighborhood.

3. **Email your complaints to ahollister@sonomacity.org and jreefe@sonomacity.org.**

Full-Power Verizon Cell Towers are coming to PG&E utility or city light poles on your street. AT&T, T-Mobile, Sprint or even Verizon **could come to the pole near your home, next.**

**Safety:** Cell towers on or near fire stations caused **brain abnormalities** in every firefighter examined. In Santa Rosa, peak RF microwave radiation of **170,000 µW/m²** was metered at 100 feet from a cell-site. **1-10 µW/m²** is all that is needed and is in Sonoma now.

**Privacy:** Cell towers this close to homes are bad because we lose control over the real estate. Once a Wireless Carrier grabs a pole, it **can add additional 4G and 5G equipment, increase the size and up the power output** — without any public review.

**Property Values:** homes near cell towers are **devalued** 20-25%.
