

# My Street, My Choice!

Don't let Napa be the place where **Democracy Dies** and **Cell Towers Metastasize**.

 **CAUTION**

  
**CELL TOWER  
MICROWAVE RADIATION  
HAZARD**

**Cell Towers 15-50 feet from homes!**

**Full-Power Cell Towers** are coming to city-owned utility or light poles on your street. The pole near your home **could be next**.

**Safety:** Cell towers on or near fire stations caused **brain abnormalities** in every firefighter examined. **You could be next.**

**Privacy:** Cell Towers this close to homes is a 24/7 surveillance grid. Once Verizon grabs the real estate, it can **increase the power, height, or width and swap out equipment**, without review.

**Property Values:** homes near cell phone towers are **devalued** 20-25%. **Your home could be next.**

## What You Can Do:

1. Preserve your neighborhoods through **strength in numbers:** the 99% far outnumber the 1%. It is time to fix the huge problem that is coming to *Napa's residential zones* by demanding a stronger Napa Wireless Ordinance and convincing the City of Napa to cancel all Master Licensing Agreements that the City signed with Big Wireless companies.
2. Visit the **mystreetmychoice.com** Napa page and click the **green button** at the top of the page; complete the form to enter your comment/question into the public record.
3. **Email and call Napa City Council members** listed on the Napa page to get them to **Limit the Effective Radiated Power** from small Wireless Telecommunications Facilities (sWTFs) to only that needed to place a phone call (hint: 40 milliwatts or 0.04 Watts from the face of the antenna shroud). **Read more at:** at <http://mystreetmychoice.com/napa.html>

# Generation Zapped Errata

*Documentary films with high production values, like Generation Zapped, take a long time to make and generally get some things right, some wrong, and are somewhat out-of-date. With no disrespect to the team that financed, produced and shot this high-quality film, it is important to ensure that viewers have the most accurate and up-to-date information about of the hazards of pulsed, data-modulated, Radiofrequency Microwave Radiation exposures and the strategies/tools that communities can use to defend themselves against the onslaught of unnecessary Wireless expansion, promoted in US schools and neighborhoods in 2018 — including the misguided, and unnecessary expansion of Close Proximity Microwave Radiation Antennas (CPMRA) into residential zones — which communities can successfully deny, as Monterey and Hillsborough just did.*

## Clarification/Corrections

1. Use adapters to connect tablets and laptops to **Ethernet wires — both feasible & cost-effective for schools.**
2. RF microwave radiation exposure over time, not the rate of exposure is what really matters. Minimize exposures.
3. FCC RF Microwave Radiation exposure guidelines are commercial—not safety — guidelines and **are not protective.**
4. Proximity and duration of RF/MW radiation is more important than intensity.
5. **Electromagnetic Sensitivity** (not Electromagnetic Hypersensitivity) is the disabled characteristic recognized by the Federal Access Board since 2002.
6. 10,000+ studies are sufficient to establish that RF radiation is a toxic agent & a Group 1 carcinogen. **More research is not needed before taking action.**
